Director’s letter

“You still have tears to shed, Father Berto said, but this is how you will learn to wipe away those of others.” We cannot look back on the past year without talking about the long-awaited end of a health crisis that has brought the country to a standstill for two long years. We should rejoice, yet we still have “tears to shed” because what the foundation must face are the consequences of this global slump: misery amplified by the economic crisis, the multiplication of abuses, aftermath of prolonged and senseless lockdowns, the huge deschooling of young people in the Philippines. The sanitary earthquake was terrible, but the aftershocks are even more devastating. ANAK-Tnk is at the forefront. Unfortunately, the end of a health crisis does not mean respite, quite the contrary.

It is therefore a question of being ready, of not relaxing any effort and of being on the lookout to best respond to the needs that will arise, to the poor who will come knocking at the door of the foundation.

And here I want to pay tribute to the entire team of foundation employees who have been able to respond with unfailing dedication to the terrible challenge of Covid, but also know how to stay alert every day that God offers to serve the children of the foundation.

May our prayer continue to support an edifice that rests only on Him.

Father Matthieu Dauchez
AUDITED FINANCIAL ACCOUNTS

All the accounts of the foundation are yearly audited, by an external auditor. For the last few years, the foundation has been audited by Reyes Galang King & Associates, a member of Kreston International which belongs to a network of independent accounting firms.

FINANCIAL STATEMENTS CERTIFIED BY BIR

The financial statements of the foundation are then yearly presented to the BIR (Bureau of Internal Revenue) and certified.

DSWD ACCREDITED

The previous years TNK was DSWD licenced. Six years ago the foundation was accredited by DSWD. Accreditation gives authority to an agency to implement social work or social welfare and development services.

Through accreditation, DSWD support TNK in providing effective, relevant and quality social services, DSWD also seek to protect the trust of the people by promoting accountability, transparency, professionalism and integrity in delivery of social services.

In 2022, TNK’s accreditation was renewed (level 1 & 2) for some of the centers by the DSWD and will continue in 2023 for the others.

PCNC ACCREDITED

On November 13, 2019, the accreditation of the Foundation has been renewed until 2022 by PCNC (Philippine Council for NGO Certification), which is a Government-led agency to certify non-profit organizations that meet established minimum criteria for financial management and accountability in the service to underprivileged Filipinos. The renewal of this accreditation was launched in 2022.

It is a new recognition of the work done by the Foundation towards transparency and good financial management of the donations received.

TAX DEDUCTION FOR DONORS

The accreditation by PCNC is the last step to conclude the process to receive, from the BIR (Bureau of Internal Revenue) the Certificate of Registration as a Donee Institution giving DEDUCTION for the DONOR and EXEMPTION FROM DONOR’S TAX.

This certificate has also been renewed during 2022 until 2025.

EXEMPTION FOR REAL PROPERTY TAX

As a non-profit, non-stock organization dedicated to the street children, the foundation is exempted from the real property taxes on the houses that the foundation owns.

BARANGAY BUSINESS PERMITS

In order to operate, every corporation in the Philippines should be registered in the local administration.

Mayor permit, business permit, fire permit, sanitary permit and locational permit are requested to be registered.

All our twenty-eight facilities secured the permits needed.
VISION

Children and any vulnerable human being protection and formation in accordance with the highest tenets of moral and spiritual values to fulfill self-autonomy, service to others and dedication to the nation. Every human being is a creature of God deserving love and care. Responsible adults must help the children and all vulnerable who are neglected, abused by irresponsible adults. The Foundation is there to provide the children, street children, children from very poor families, and neglected elders their basic human needs and to prepare the youth for a brighter future through a complete formation taking into account all human dimensions and skills.

MISSION

TNK would like to help every child and all the vulnerable to reach the fullness of his vocation, through his basic needs and rights, his desire to study or to get training for the ones capable, his wish to be reconciled to his family but most of all, his thirst for being loved. The goal of TNK is to give back self-dignity and confidence to the children and the vulnerable, to lead the youth to a complete autonomous life and the elders to live the end of their life with dignity.
Tulay Ng Kabataan Foundation helps the most unfortunate people of Metro Manila
2 programs to help the poorest ones of Metro Manila

**STREET Programs**

414 Children, 11 Elders  
28 centers

**Situation**  
Abandoned to all kinds of dangers in the street, the street children are the most vulnerable, ready to do anything to survive. There are thousands of them who have broken all ties with their families, who are victims of violence and drugs and who are subjected to begging, theft and prostitution.  
We provide them with complete structures for their social rehabilitation.

**Our Goal**  
To meet the basic needs of all abandoned children and elders, without exception. Our homes are suitable for children such as toddlers, young people with special needs, students and the elderly.

**Profile**  
Street children, street children with special needs, elderly abandoned in the streets.

**SLUMS Programs**

4001 Beneficiaries  
11 Daycare centers

**Situation**  
In the midst of Metro Manila, thousands of families suffer daily from the hardships of the life of the slums. To meet the basic needs of these poor communities, the foundation has created a program to empower parents to be themselves the catalyst for change.

**Our Priorities**  
Aware of the dire situation of children and their families, ANAK-Tnk focuses its actions on four essential priorities: feeding them, providing them with an education, giving them access to healthcare and giving them a protective environment.

**Profile**  
Children below 6 years old and their families, pregnant women.

* “Children” refers to individuals enrolled in one or several programs of the foundation.  
** One “Beneficiary” refers to one child who take profit of one service of the foundation. Are not counted the hundreds of children benefiting the programs punctually.
STREET CHILDREN

SITUATION

There are thousands of street children in Manila without any link with their families. They are surviving alone on the streets of Manila by begging, stealing or prostituting themselves. Easy preys for gangs, most of them become drug addicts and victim to all kinds of abuse (physical, sexual...).

ACTIONS & SERVICES

IN THE STREET: The first step is the day and night presence of educators and social workers in the streets where these children live. They create bonds through discussion, activities and games that enable them to freely choose to join the foundation.

DROP IN CENTERS: Open day and night, the two drop-in centers are shelters where children receive what they so cruelly miss in the street: love, education (with « bridge class » to prepare them for formal schooling), compassion, health care, staple items such as food and clothes.

RESIDENTIAL HOMES: The assessment of the situation by the social workers very often reveals that reconciliation of the child with his family is not appropriate. In such cases, children are accommodated in one of our 25 residential homes, where they live in a family atmosphere.

EDUCATION: The child then integrates the public school of his district and grows in the home until his autonomy. Children are enrolled in public schools adapted to their situation, from kindergarten to university, vocational training or training in agriculture, cooking or services in partnership with companies involved in these sectors. In order to protect those most exposed to the dangers of the streets - gangs, drugs or conflict with the law - the foundation has opened a rehabilitation farm outside Manila. Through these different types of education, children can regain their dignity and prepare for their future.

GOAL

RECONCILIATION of the child with his family whenever it is possible. Registered social workers try to find the whereabouts of the families and, little by little, recreate a link between the parents and their child. Though reconciliations are rare, it is always heartwarming to see a child reconciled with his peers since problems often come from within the family.

PROTECTION: we care and support children as long as needed with psychological and legal help, based on our Child Prevention and Protection Chart.
Among the abandoned children living in the streets of Manila, some have handicaps – which make them even more vulnerable. Since 2006, the foundation has maintained specialized homes, providing them with the specific care they need and protecting them by offering the means for a more autonomous life.

**SITUATION**

Among the abandoned children living in the streets of Manila, some have handicaps – which make them even more vulnerable. Since 2006, the foundation has maintained specialized homes, providing them with the specific care they need and protecting them by offering the means for a more autonomous life.

**INACTIONS & SERVICES**

**IN THE STREET**: Children with disabilities are even more at risk on the streets. They have to survive facing so intolerable situations as violence, prostitution. The foundation has opened specialized homes for them, adapted to their abilities and special needs.

**CARING with SPECIALIZED HOMES**: We offer these children an alternative to the life in the streets and counts with centers adapted to their special needs and with educators that offer them a specific adapted education and workshops. We shelter them in a family atmosphere, offering them the specific care they need. The children benefit from medical and psychological follow-up. To let this happen we have a team of graduated Filipino employees (social workers, psychologists, house-parents, street educators, health care assistant, teachers...) who take care of them 24/7.

**EDUCATION & AUTONOMY**: The foundation has opened vocational training workshops where young people with disabilities learn professional basics to gradually integrate into the world of work and become independent. The foundation also offers different educational pathways (bridging class, adapted education, vocational training) to best meet the needs of young people and prepare for their social integration. Partnerships are created with other NGOs training young people with disabilities and then employing them in companies.

**GOAL**

**RECONCILIATION**: Our social workers are looking for the family members of the children. The first goal of the foundation is to recreate the link between the child and his family whenever possible.

**PROTECTION & LONG TERM CARE**: We care and support children as long as needed with psychological and legal help, based on our Child Prevention and Protection Chart. Helping the most vulnerable through these shelters and workshops, gives them the opportunity to shape their own future. TNK has the responsibility to take care of those youth, some of them are already adults, as long as they become autonomous.
More and more elderly are left behind in the street. In order to tackle this issue our project is to help them the same way we are doing for the street children. However, our project goes well beyond: more than a shelter we focus also on intergenerational links and activities between our children and our elderly.

**SITUATION**

In Manila, creeping misery is not only affecting children, but also elderly, totally neglected who try to survive in the streets of Manila.

**IN THE STREET** : During daily ‘Big Nights’ to meet street children, our street educators frequently find alone elderly, abandoned, without family ties. Many renovations were made to facilitate everyday life: ramps, small clinics, grab bars...

**A SUITABLE HOME** : where everything has been thought out to meet the requirements of the social services. Above all, we wish to ensure the well-being of the new comers. Therefore, the foundation acquired a large house in a quiet neighborhood. It includes a wooded area where the beneficiaries live at their own pace. Many renovations were made to facilitate everyday life: ramps, small clinics, grab bars...

**WORKSHOP & INTERGENERATIONAL ACTIVITIES** : Personal care, workshops and rehabilitation programs are set up to enable them regaining a decent life. Participation in household chores and other occupational activities contribute to their own reconstruction.

Training sessions about personal assistance has also been set up for our young adults with special needs to offer them the opportunity to support these people while developing professional skills and life autonomy. Finally, meetings and gathering are hold between the children of all our programs and the elderly.

**GOAL**

**RECONCILIATION** : our social workers are looking for the family members of the elderly to recreate a link whenever possible.

**PROTECTION & DECENT LIFE** : to provide a family and convivial life adapted to the care of our elderly until their last breath as a family, with psychological and legal help based on our Prevention and Protection Chart. Like street children, these elderly need to restore their dignity.
CHILDREN IN SLUMS

Metro Manila is the most populous region in the Philippines and 3rd in the world. Estimated 4 million people are informal settlers stigmatized as “squatters” and nearly half of them are children living in slums lacking food, health, education. TNK’s is geared toward health, nutrition, education and family development.

SITUATION

Metro Manila is the most populous region in the Philippines and 3rd in the world. Estimated 4 million people are informal settlers stigmatized as “squatters” and nearly half of them are children living in slums lacking food, health, education. TNK’s is geared toward health, nutrition, education and family development.

HEALTH: Countless children are incessantly falling ill since they don’t have access to basic health services and even treatable diseases like pneumonia, diarrhea, and measles are still among the biggest causes of child deaths. Our maternal, newborn and child health care services are giving to the mothers and babies a healthy start. These include activities follow-ups and monitoring of pregnant mothers, immunization monitoring of infants, preschool health check-ups and medical assistance. To ensure continued health of the children, parents undergo “MAPA’s” (Mama Papa) classes where they are educated on basic health.

NUTRITION: Malnutrition is one of the leading causes of death among children. Three out of every ten Filipino children are malnourished. TNK’s response to the problem is “Oplan Operation Timbang”, Food Supplemental Feeding and Nutrition Classes. Integrated Nutrition Services activities implemented in various TNK Childcare Centers and coverage areas that seek to rehabilitate undernourished children through local, affordable and available means.

EDUCATION: About 8,400 barangays still lack even one daycare center, although a national law mandates one in every barangay. The quality of day care centers is generally inferior owing to poor equipment, scant learning materials, financial limitations and foremost not free. To ensure that toddlers and preschool children of informal settlers have access to early childhood care and development services, TNK offers Early Childhood Education and Mental Feeding Services.

GOAL

PROTECTION & DECENT LIFE: to help save and transform the lives of children & families of the poor urban communities, affected by violence, malnutrition and unhealthy living conditions, through their own empowerment.
When Smokey Mountain was closed down in 1996, many scavenger families stayed and where another large scavenging community of estimated 40,000 people arose living in the nearby dilapidated temporary housing tenements. Whole families alongside are forced to earn a living by scavenging either at the barge dumpsite.

**SITUATION**

**ACTIONS & SERVICES**

**DAYCARE CENTERS** : TNK has 4 daycare centers (2 in Tondo and 2 in Baseco) in order to meet the children urgent and basic needs. It became an actual haven for all families whose living conditions are indescribably like abysses of miseries of humanity. TNK has great concern for children because most of them suffer from the continuous of deprivations compared to children living in the usual informal settlements. Numerous children living within are born into a life of extreme poverty and are often given very little opportunity to escape the cycle.

**HEALTH, EDUCATION, NUTRITION, PROTECTION**: The living conditions are unbearable to the adult, and even to the children below 6 years old. They are exposed to all kinds of health hazards. We respond to emergencies by providing them nutritious foods, protecting them against many diseases and sending back to school for a better future. Attending school, or eating their meals at the center is the striking wand to help improve a child’s life. The longer a child stays at the center or in school the more time away from the dumpsite. In turn, their health improves by being away from putrid, toxic odors and fumes.

**GOAL**

**DECENT LIFE** : to help save and transform the lives of children & families of the poor urban communities, affected by violence, malnutrition and unhealthy living conditions, through their own empowerment.
Kindergarten class in the slums
INTRODUCTION

Summarizing the past year in one word is a bit daring, but if the word renewal is a bit of an exaggeration, perhaps we can simply talk about starting over. This is obvious when we talk about a return to a certain normality in terms of travel, return to school (even though…), constraints, but it is especially true for the foundation with regard to the projects in place, reflecting a dynamism so alienated during the health crisis. The service rendered to the little ones, the opportunity they offer us to be charitable, has revived the very soul of the mission in Manila: to be there for those who need our help. We are delighted today that all the projects, put on hold during these long months of pandemic, have finally been able to see the light of day.

Health

Health is a theme that has not just become central, but vital. The qualifier will make you smile since it is indeed a question of preserving life, but the madness of this crisis has shown above all a pathological fear of death. Nevertheless it is an anxiety that we do not encounter in the slums as death unfortunately invites itself too often in the poorest families. An annual report is not the place for metaphysical reflection, but this heightened disorder during the pandemic has clearly revealed the abysmal health deficiencies found in the streets and slums of the capital. Our medical team led by Joseph, faithful for so many years, got through the crisis without difficulty and in an imperturbable way.

Education

We have often heard that in terms of education, the “Covid” generation will have been sacrificed on the altar of health ideology. With a dropout rate of around 20% of students, the Philippines are not exempt… the foundation, on the other hand, obviously is. The team of teachers took charge of the crisis and the post-crisis period with great professionalism, which enabled all the children of the foundation to continue their schooling normally, but even more so to preserve social bounds between the children. The fruits go far beyond the school level alone.

The year 2022 has seen both the end of a school year under the pandemic regime, and the start of a school year that has returned to a certain normality. The children went back to school not without a certain relief obviously, but by closing a chapter out of time when the school was dispensed entirely within the walls of the foundation.

To be noted: now the school year no longer takes place from June to March, but from September to June, thus following more closely the Western calendar.
2022 Highlights

In the slums

We hoped to be able to quickly return to a normal tempo in the slums, especially with regard to the kindergarten education given to the youngest of our beneficiaries. But if the limitations due to the pandemic ended in the middle of the year, we could not observe a real return to normal even after the lifting of the restrictions. There are habits adopted by the families, and perhaps a certain mistrust, which have not facilitated the resumption of the school pace in the slums.

We must also admit that our own team remained very cautious, given the random and sometimes contradictory information given by the Ministry of Education. In terms of health, as well as for the nutrition, the situation is similar. The team led by Rina Paldez, who has worked with the foundation since its inception, has been exemplary and have maintained an unlikely level of service given the restrictions imposed, with an obvious, but probably unfair, zeal in the slums.

Street education

We expected a tidal wave in the streets of Manila after the lifting of the national lockdown, the wave did not take place. In any case, not as blatantly as one might fear. Habits in the streets have changed a little with a larger presence of small police satellites spread in the different districts of the city. Street children can no longer take possession of squares or crossroads in full view of everyone and choose more discreet, darker places. This does not facilitate the work of educators who are not discouraged and have never broken the link with groups of street children. The arrival of the new president has not appeased the tense atmosphere, particularly under the pretext of drug trafficking, and the settling of scores continues even more strongly. The foundation unfortunately counts a few victims of this absurd war among its former beneficiaries.
“Outreach” in the streets of Metro Manila
2022 Highlights

The summer camp

The highlight of the year for all the children sheltered by the foundation is without a doubt the summer camp which takes place during the summer holidays. The pandemic has obviously prevented such an activity, which is yet so necessary, not only for the well-deserved rest of the students, but also and above all to promote the unity of the foundation as a whole.

The year 2022 saw the great return of the summer camp: 420 children and nearly 200 employees gathered for ten days in a holiday camp on the Pacific coast. A time… out of time precisely, which delighted the whole group and served as a final point, at least symbolic, to this interminable health crisis.

Concretely…

We will discuss the details of the projects completed during the year, sign of an obvious recovery in dynamism, in the following pages. Note however the constant challenge, and terribly amplified during the pandemic because of the successive cancellation of exams, of finding social workers to accompany the children. If our group of employees is, on the whole, very stable and dedicated to the children of the foundation, the group of social workers remains very unstable and rare are the social workers who commit to the long term. This is mainly due to the search for a salary that foundations like ours cannot offer, as well as to the immaturity of young graduates who favor more the comfort of their activity than the fulfilment that they can find in it.

The launch of a huge project in the Province, called Liwanag (light in Tagalog), which could bring together the farm, an activity camp as well as a hotel school and its application resort is both dizzying and marvelous. A dream which, if it becomes a reality in the next few years, will complete the circuit that allows the most disadvantaged children to get up and aspire to a… « luminous » future!

Alex and Jicel, YES to life!

My first memory of Alex dates back to 1998, when the foundation in Manila had not turned one yet. Along with Pascal Breton, one night, we walked the streets of the city of Manila, with a street educator and a social assistant, to reach the abandoned children on the streets of the capital. All of a sudden a young boy appeared out of nowhere, bare foot, skinny, holding his small plastic cup to beg for a few coins. With his dirty shorts and ragged polo shirt, Alex could have been the stereotypical young beggar had he not borne the most radiant smile which contrasted clearly with the rest of himself. This smile – as we were to find out in the following years – never left him. It was his strength, the indestructible rock of his resilience: Alex was leaving his street life for good. He was nine years old, and had just made one of the most important decisions of his life. More than twenty years later, he made another major decision: he said ‘yes’ to Jicel with the same radiant smile. This ‘yes’ will also radically change his life: he has decided to build his own family. The little bird has left the nest. But Alex wants, above all, to make his future children with his wife Jicel happy, filled with the love he was not given as a child. An indescribable consolation. Love always wins in the end.

An unexpected reunion

Marissa was reunited with her mother after 16 years of searching. A street child with disabilities, Marissa joined our homes at the age of 11 in 2006. Today she has 28 years old and reach Senior High School, Grade 12; she is also a great help in the daily life of her “Jerome Lejeune Home” and is an amazing “big sister” for the younger girls, always teaching them and being the good example.

The street educators had no idea who her family was, no way to find her. However, after 16 years of searching, and thanks to the social media, the educators found her mother. After 16 years... Unbelievable. Accompanied by her social worker and one of the TNK’s psychologists, Marissa went to meet her mother. It was an overwhelming reunion...

Mother and daughter hugged spontaneously and for a long time, Marissa consoling her mother. A moment out of time, an immense emotion, and Marissa so edifying...

**Courageous child : Angela, 9 years old, ragpicker**

Barefoot, with a large plastic bag strapped to her back, her eyes sparkling and full of confidence, Angela is proud to tell us about her daily life. As a beneficiary of our actions for the families in the slums, Angela, a ragpicker, attends the school support of one of our day centers right next to the Manila dumpsite.

“In the morning I go to the public school, I am in grade 3 and the rest of the day if my mother does not have enough money for meals, I go to the dumpsite to collect plastic, cans and carton. I make a few pesos and give them to my mom. Sometimes at school the other kids tease me but it doesn’t matter, they don’t know how to help their family! My mother encourages me to continue my studies and the tutoring at the foundation’s center helps me a lot because my dream is to become a doctor. Then I could help everyone here.”

**TNK’S HUMAN RESOURCES**

210 Filipino employees

Street educators, teachers, psychologists, house parents, center coordinators, registered social workers, drivers, etc.)

3 permanent members

61 volunteers mothers in the slum areas

6 foreign volunteers

Source: Bloomberg 2022
2022 Progress report for the projects

After more than 2 years without being able to carry out our various essential projects for the good health and sustainability of the foundation, this year 2022 has been particularly fruitful in terms of major projects with in particular the opening of 4 new homes or centers.

1. Home for girls with special needs #2

These young girls require specific attention and care; some of them had been waiting for the opening of this home for 2 years at the emergency reception centre. The renovation permits being blocked administratively at the town hall of Quezon City, it was impossible for us to carry out the work.

After a few months of work, in April 2022 we were finally able to open the “Saint Josephine Bakhita” home and welcome these young girls in the best conditions.

2. Home for girls #6

The stability of the children having increased during this period of COVID, it became urgent to open a sixth residential home for young girls (7-18 years old). It is close to Residential Home for Girls #5 and 2 nurseries for girls. After a long delay for the renovation permits, we renovated a building left vacant for this purpose using the standards adapted to the foundation and following the recommendations of the Philippine social services.

3. Home for boys #7

For the same reasons as for the centers for girls and adding the fact that there are a few more boys arriving at the foundation, we were obliged to acquire a property, in the same neighborhood as the other centers, to be able to open the Residential Home for Boys #7. After a simple renovation and the creation of a basketball court in the courtyard, the “Blessed Carlo Acutis” home opened its doors in early September 2023.

Another building is available for a future shelter.

4. New daycare center in “Sitio Sais”

Our team conducted a door-to-door survey in the slum of “Sitio Sais” where families are surviving by making charcoal. The survey has revealed huge needs in the community. Thus, TNK decided to open a new daycare center: the “Saint Rita” center was launched on May 2022.

The building being a little too small, the center will therefore have to be enlarged quickly to be able to accommodate all the activities of the foundation.
5. Two new vans

The Mitsubishi L300 van could be one of the emblems of the Philippines because of its robustness and reliability. The foundation uses these vans to transport children and staff and to deliver food and equipment to all TNK homes.

For safety and also ecological and economic purposes, the foundation has renewed 2 of these vans over 10 years old.

6. Relocation of the daycare center of “Catmon 2”

Due to the end of our lease, we had to find a new building adapted to the needs of the foundation’s activities, but above all close to the families of the children welcomed in the center.

Our teams found a small plot where we were able to build the new center “Saint John-Paul 2”.

7. Acquisition of a farm in Quezon province

After 14 years in the province of Bataan, our rehabilitation farm for street children (opened in 2008), had to be moved. Thus TNK was looking for another place far from Manila.

After numerous and unsuccessful visits on the Philippine roads, we had the chance to acquire an 11ha coconut palm farm by the sea in the province of Quezon, southeast of Manila. (See p. 27-28).

8. Renovation of the daycare center of “Aroma”

2022 was focus on the opening of news centers for street children that were delayed because of the long lockdown. So we had to postpone the renovation of the Aroma’s daycare center.

However, it will be one of our priorities for 2023.
A LONG-TERM PROJECT TO HELP PREPARE THE FUTURE OF THE MOST DISADVANTAGED YOUTH

Origin of the project

The main goal of TNK is to take care of and accompany abandoned street children until they become independent. Thus, for 25 years TNK has developed an expertise to accompany them in their life and their studies. However, a step is lacking to better accompany them into the working world.

Therefore, TNK wishes to offer quality professional training to the most underprivileged youths, offering them real possibilities of stable employment.

Project

To create a school of tourism for the most underprivileged young people, in Quezon province on the site of our farm of rehabilitation for street children (11 hectares along the seashore).

Why tourism?

1. Tourism is a sector that covers many kinds of jobs, for all levels of education.
2. In the Philippines: culturally the family bond is strong, so young people often look for a job close to their family. However, our young Filipinos have few family ties (because they are abandoned children), so they are ready to work anywhere geographically.
3. Tourism in the Philippines: the country is composed of more than 7000 islands and 11% of the employment is related to tourism, so there are quite important job opportunities in this field.

-> Hence the idea of creating a tourism school with a resort and a restaurant for underprivileged young people and also for those with disabilities.
The 5 projects of Liwanag

01 Farm and formation center
Goal: Transfer of the Farm launched in Bataan in 2003. The actual place is a half-hectare property. The new place would allow a real farming activity in an 11 hectares area in Quezon province. Agricultural training in partnership with the Department of Agriculture of the Philippines.

02 Activity Camp
Goal: to offer to the street children a place where they can enjoy beach leisure and be far from the hell of the street of Manila. The place would be used also for welcoming different groups.

03 School of Tourism
Goal: to open a school aimed at training the young adults from the street to all the different jobs related to tourism. Cooking, restaurant, resort and hotel service, guest entertainment, maintenance etc.

04 Resort & Restaurant
Goal: Launch a high-standard resort and restaurant in order to train the candidates with strict and demanding working conditions to prepare them for total independence.

05 Job opportunities and training for Youth with special needs
Goal: Give job opportunities to the young adults with special needs and allow their training for possible placement and independence.

Liwanag means 'Light' in tagalog, language of the Philippines. Because the project aims to be a light of Hope for the most vulnerable youth.
1. Construction of a house for the OLMC center
   With the acquisition of a 11ha farm in the province of Quezon, the OLMC center (situated in Bataan Province since his opening in 2008) was transferred there this September 2022, but TNK need now to build a house in order to shelter the children in good conditions.

   Start of the construction: 2023
   Estimated Investment:
   • 6,5 m pesos for the construcion

2. Construction of a “camp”
   As part of our “Liwanag” project in Quezon province is the construction of a “camp” in order to welcome the summer camp of the foundation but also many outside activities and others trainings.

   Start of the construction: 2023
   Estimated Investment:
   • 6,5 m pesos for land preparation/fencing
   • 30 million pesos for the construction

3. A new shelter for boys #8
   This year again, because of the stability of the children and a high fetching of boys, we need to open another center using a remaining building in the property bought in 2022.

   Opening expected: September 2023
   Estimated Investment:
   • 1 millions for the renovation.
   • 2,2 million pesos for the running expenses

4. “Aroma” daycare center rehabilitation (posponed in 2022)
   The daycare center of Aroma was opened at the time of the closure of the “Smokey Mountain”, open air dumpsite in 2014. This site need a renovation and an extension

   Opening expected: September 2023
   Estimated Investment:
   • 600.000 Pesos

5. Extension of the daycare center of “Sitio Sais”
   Open in 2022, in order to better serve the children, our team is considering an extension of this center.

   Opening expected: September 2023
   Estimated Investment:
   • 250.000 Pesos for the rehabilitation

6. Purchase of a house for the “Street Children” program
   In a real estate context in constant inflation, it is important to predict the future and anticipate our needs for centers that are filling up quickly. This house is near the foundation and easily adjustable.

   Date of purchase: may2023
   Estimated investment :
   • 850 K€: purchase of house
Creation Of Tulay Ng Kabataan, Inc.
- Opening of the first center for street children and one carpentry.
- The help to children living in the slums of Manila is brought by local communities.

Opening of the first centers
- Opening of new residences for boys and centers in the slums.
- New Center for Scavenger Children in the Smokey Mountain.
- First center for girls under the Street Children Program.

Extension of the programs
- New centers for street children including a home for students.
- Launching of the new program for children with disabilities.
- Opening of a new rehabilitation center in Bataan (farm) for the most unstable children.

New Executive Director
- Father Matthieu Dauchez is appointed as the new Executive Director by the TNK board.
- Acquisition and construction of the new office at 94 Kalayaan Avenue, Quezon City.

Consolidation of the Foundation
- New workshop for children with disabilities
- Launching of the nursery project
- Acquisition of new houses for Street Children Program.
- Reorganization of the scheme of Human Resources.
- Internationalization of ANAK-Tnk volunteers group in Singapore, USA, Switzerland, UK.

Visit of Pope Francis at the Foundation
- Visit of Pope Francis to the children of the Foundation in January 2015.
- DSWD accreditation (Philippines social welfare department)
- New center for Scavenger Children Program.
- Launching of ANAK-Tnk volunteers group in Spain.

Anticipation Budget for buying new houses = 49,789,057 php
During 2022, with the opening of three new residential homes, TNK had to hire fifteen new employees to form the new teams. The foundation has also decided to carry out a salary increase in order to thank our staff for their work, to help them financially as well as their families often in precarious situations and also to try to minimize the inflation which is exploding here in the Philippines.
